8. FAQ
A. The user can change the mouse button assignments for left-handed.
   1、Open control panel,and double click Mouse Icon .

   2、Select Buttons configuration box in the Mouse Buttons Tab .

B. If you installed your mouse as indicated in the manual, but the pointer still is not moving. Make sure you have switch on the switch and fully charged your mouse.

C. When plugged the USB nano adapter into your computer,no drivers seemed to load. You can un-plug and re-plug your nano adaptor again, it should be Ok because it is plug and play.

D. The warranty of Digitz EZmouse is Five years.

E. If your wireless mouse was working fine, now it is not responding correctly. You can un-plug and re-plug your nano adaptor again, make sure you have switched on the switch and fully charged your mouse. Then you can see the red color of LED on back side after switch on.

F. The internal and external batteries can work 30 hours in total after fully charge.

G. The optical mouse moves too fast or seems to double click on its own.
    1、Open control panel,and double click Mouse Icon .

    2、Adjust Double-Click speed in the Mouse Buttons Tab .Then click Apply.

H. Windows recognizes the USB Human Interface. The mouse has been "freezing" and not responding for 15-20 seconds.It is normal when you first time to plug into the nano.Be sure that your external battery is charged full until the green light lit up. Then replace it back again in the Digitz EZmouse.
